Answer all the Questions

1. Discuss the bacterial virulence factors.
2. Describe agglutination reactions in detail.
3. Immunomodulators.
5. Fluorescent microscope.
6. Graft Versus Host reaction (GVH).
7. Delayed Hypersensitivity.
8. Immunodeficiency diseases.
10. Immunochromatographic tests.
Rajiv Gandhi University of Health Sciences, Karnataka
MD Degree Examination – MAY-2018

Time: Three Hours
Max. Marks: 100 Marks

MICROBIOLOGY
PAPER – II
Q.P. CODE: 7356

Your answers should be specific to the questions asked
Draw neat labeled diagrams wherever necessary

Answer all the Questions 10 x10 = 100 Marks

1. Enumerate the bacterial causes of PUO. Discuss the pathogenesis, laboratory diagnosis of undulant fever.

2. Discuss the aetiology and laboratory diagnosis of Primary atypical pneumonia.

3. Rapid diagnostic test for MRSA.

4. Viridans Streptococci and paediatric infections.

5. Neonatal meningitis.

7. Multidrug resistant tuberculosis.

8. Laboratory diagnosis of cholera.

MICROBIOLOGY
PAPER – III
Q.P. CODE: 7357

Your answers should be specific to the questions asked
Draw neat labeled diagrams wherever necessary

10 x 10 = 100 Marks

1. Enumerate viruses causing respiratory infections. Discuss pathogenesis and laboratory diagnosis of Swine flu.
2. Describe the dimorphic fungi. Discuss in detail Histoplasma capsulatum infection.
3. Laboratory diagnosis of rabies.
5. Mycotoxicosis.
6. Hepatitis A virus.
7. Epidemiology and control measures to overcome Dengue.
8. Cryptococcosis.
9. Rhinosporidiosis.

MICROBIOLOGY - PAPER – IV
Systematic Bacteriology Parasitology
Q.P. CODE: 7358

Your answers should be specific to the questions asked.
Draw neat labeled diagrams wherever necessary.

Answer all the Questions 10 X 10 = 100 Marks

1. Describe the life cycle and laboratory diagnosis of Echinococcus granulosus infections. Add a note on its prevention.
2. Discuss the life cycle and recent advances in the laboratory diagnosis and preventive measures of Trypanosoma gambiense.
3. Dracunculus medinensis.
4. Babesia.
5. Leishmania donovani.
7. Immunology of parasitic infections.
8. Quantitative buffy coat smear examination.
10. Primary amoebic meningoencephalitis.
